†**Pompelmoose, pampelmouse** (pǫ̃mp-, pæ̃mpl'mūs). Forms: 7–8 **pompelmoes,** 7 **pampelmouse,** 8 **pamplemose, pumplemus,** 8–9 **pompelmoese,** 9 **pompel-mos, pompel-mousse, -mous, -mous; pumple-, pamplemousse, pampelmouse;** also 7–9 **pumplenose,** 8 **pumble-, pummel-, pimple-nose.** [A name which arose in the Dutch Indies in 17th c., and is given by early writers as the Dutch name of the fruit. Du. *pompelmoes* is recorded from 1676; F. *pampelmouse* (now *pamplemousse*) from 1696.

There is no native name in Malaysia resembling *pompelmoes*; the Javanese name is *djeroek*, the Chinese *yu.* In the opinion of Dr. Kern of Leiden, who has given special attention to oriental words, this is a compound, of which the second element is prob. *limoes* (in Fr. orthography *limousse*), a name applied to this fruit in Old Javanese, Malay, and Lampung, borrowed from the Pg. *limoes* pl. of *limão*, lemon, citron, under which the Portuguese included the species of *Citrus* found by them in the East. In Malay, *limo* or *limau* is still used in this general sense. The first element may prob. represent the Du. *pompoen* pumpkin, in reference to the large size of *Citrus decumana*, so that *pompa limoes, pompelmoes* may have been compressed forms of *pompam-limoes*, i. e. 'pumpkin-like citron', an apt descriptive designation. The name *pampona* was actually applied to the fruit by Tavernier, *Voyages aux Indes*, Paris 1676, Eng. translation, London 1677: see Pompion 2. The corrupt Tamil *bambolmas*, given by Littré and Hatz.-Darm. as source of the Fr., with the more correct Tamil *pampalimāsu*, and numerous variants cited by Watson, Yule, etc., are merely corruptions of the Du. or Fr form. The fruit is not native to India, but was introduced from Java (app. in the 17th c.), in Ceylon under its Dutch name; in Bengal its source is indicated by the designation *Batavi-nimbū* or *-mbū*, Batavian Citron.]

†Pomple, pumple. *Obs.* [Etymology unascertained.] Some kind of fodder for oxen used in the north of England in the 14th century.

But the season of the year in the one case, and the association with hay (*cum feno*) in the other, make difficulties.

[*Note.* In Eng use this word has undoubtedly from the 18th c. been identified with POOL *sb.*[1]: see quots. 17 ,1766 in sense 1, with their references to the *fish* in the *pool*. But the French use of *poule* for the same thing, with the fact that the French is found earlier, makes it almost certain that the term was taken from Fr., and associated with the Eng. word *pool*. F. *poule* is held to be a sense of *poule* hen, chicken, being perh. at first slang for 'booty, spoil, plunder'. Mme. de Sévigné in a letter of 29 July 1676 uses *poule* exactly in the sense of Eng. *pool*; and in a letter of 30 June 1680 says 'Si Denjean est de ce jeu, il prendra toutes les poules; c'est un aigle', a play upon the sense 'hen'. The Dict. of the Académie, ed. 1, 1694, and that of Furetière, ed. 2, 1701, also explain *poule* almost in the words in which it stands in the Dict. Acad. ed 7. 1878: 'Poule se dit, à certains jeux, de la quantité d'argent ou de jetons qui résulte de la mise de chacun des joueurs et qui appartient à celui qui gagne le coup. *La poule est grosse. Mettre à la poule. Gagner la poule*'. There is perh. a similar relation between F. *fiche* a fish at cards, and the Eng. 'fish' in the 'pool'.]

OF. *povre, -ere, poure*, in mod.F. *pauvre*, dial. *paure pouvre, poure* = Pr. *paubre, paure*, It. *povero*, Sp., Pg. *pobre*:—L. *pauper*, late L. also *pauper-us*, poor. The mod.Eng. *poor* and Sc. *puir* represent the ME. *pōre*: with mod. vulgar *pore*, cf. *whore* and the pronunciation of *door, floor.*

On account of the ambiguity of the letter *u* and its variant *v* before 1600, it is uncertain whether ME. *pouere, poure, power*, meant *pou-* or *pov-*. The phonetic series *pauperem, paupre, paubre, pobre, povre*, shows that *povre* preceded *poure*, which may have been reached in late OF., and is the form in various mod.F. dialects. But the 15th and early 16th c. literary Fr. form was *pourre*, artificially spelt in 15th c. *pauvre*, after L. *pauper*, and ME. *pōre* (the source of mod.Eng. *poor*) seems to have been reduced from *povre* like *o'er* from *over*, *lord* from *loverd*. Cf. also Poortith, Porail, Poverty. But some Eng. dialects now have *pour* (puuɹ), which prob. represents ME. *poure* (pūrə).]

On the other hand, this plant appears to have been sometimes included under the name *poppy* (see POPPY 2), and conversely the name *popple* is now in some districts (esp. Cumberland and Yorkshire) applied to the corn poppy; so that the names may possibly have been originally related, *p-pil* being a derivative either of *pupi*, *popy*, or of one of the Romanic representatives of *papaver*. see POPPY. The alteration may have taken place, after the Teutonic change of stress, by assimilation to the suffix *-ag*. As with that suffix, the ending was subseq. weakened to *-ig* (cf. *ladig*, *monig* from *audag*, *menag*), giving the typical WSax. *popig*, whence ME. *popi*, *popy*, mod. *poppy*, with doubled consonant expressing short vowel; cf. *penni*, *peny*, *penny*. A plant (or flower) of the genus *Papaver*, comprising herbs of temperate and subtropical regions, having milky juice with narcotic properties, showy flowers with petals (usually four in number) of delicate texture and various colours (often becoming 'double' in cultivation), and roundish capsules containing numerous small round seeds.

The β, γ, and δ forms appear to be English corruptions, due to imperfect apprehension of the foreign word, and to 'popular etymology' identifying the ending with *pen, point*, etc.; the type *portepyne* may have arisen out of F. *por(c) d'épin*, with *c* mute. The ε forms really represent a different compound, viz. Hence, a child born after his father's accession to the throne; and in more general or vague sense, = One 'born in the purple': see PURPLE *sb.*

The actual origin of the name *Porphyra* is disputed.

1. The word used to render L. *porphyrītēs*, Gr. *πορφυρίτης*, the name given to a beautiful and very hard rock anciently quarried in Egypt, composed of crystals of white or red plagioclase felspar embedded in a fine red ground-mass consisting of hornblende, plagioclase, apatite, thulite, and withamite, the last two being bright red in colour. By modern poets often used vaguely, in the sense of a beautiful and valuable purple stone taking a high polish, including red granite and marble.

The site of the ancient quarries, after being long lost, was discovered by Burton and Wilkinson at Gebel Dokhân, near the Red Sea, in lat. 27° 20' N.

In It., *porfido nero, porfido verde*, were applied to black and green rocks of porphyritic structure obtained from Sardinia, Greece, and elsewhere, and these have been englished as *black* and *green porphyry.*

3. *Geol.* and *Min.* **a.** A rock consisting of a compact base of felspathic or other unstratified rock containing scattered crystals of felspar of contemporary age.

1796 Kirwan *Elem. Min.* (ed. 2) I. 349 Any stone which in a siliceous or argillaceous ground, or basis, contains scattered specks, grains, or dots of felspar,..is at present denominated a *porphyry*. 1813 Sir H. Davy *Agric. Chem.* iv (1814) 193 Porphyry consists of crystals of felspar. 1833 Lyell *Princ. Geol* III. Gloss. 77 *Porphyry*. is hence applied to every species of unstratified rock, in which detached crystals of felspar are diffused through a base of other mineral composition. 1839 Ure *Dict. Arts, Porphyry*, is a compound mineral or rock, composed essentially of a base of hornstone, interspersed with crystals of felspar. 1869 Bristow tr. *Figuier's World bef. Deluge* ii. 33 True porphyry presents a paste essentially composed of compact felspar. 1876 Page *Adv. Text-bk. Geol.* vii 134 The porphyry of the mineralogist consists of a reddish felspar basis with disseminated crystals.

b. In more general sense: Any unstratified or igneous rock having a homogeneous base in which crystals of one or more minerals are disseminated.

Variously specified as *felspar porphyry* (= a), *basaltic, claystone, granitic, greenstone, hornstone, mica, pitchstone, trachytic porphyry*, etc. *Quartz porphyry* has as groundmass an intimate mixture of orthoclase and quartz, containing distinct crystals or large grains of quartz.

The name is sometimes applied even to rocks in which the porphyritic crystals are absent. Many limitations or definitions of the term have been proposed by modern mineralogists, continental and British, but without any general agreement as to the basis of definition: see, in English, Sir A. Geikie *Text-bk. Geol* (ed. 1885) 149, Prof. Bonney in *Proc. Geol. Soc.* (1886) XLI. 72, Harper *Petrology for Students* (ed. 1902) 126, etc.

1813 Bakewell *Introd. Geol.* (1815) 119 The term porphyry is very vague, being applied to all rocks that have a compact base or ground in which crystals of any kind are imbedded and distinctly visible. 1838 Lyell *Elem. [*Note.* The extension of the sense 'haven' or 'harbour-town' to an inland town presents difficulties, though an explanation has been sought in the definition of L. *portus*, in the *Digest* L. xvi. (*De verb. signif.*) 59 'Portus appellatus est conclusus locus, quo importantur merces et inde exportantur; eaque nihilo minus statio est conclusa atque munita'. The transference of sense from 'gate' to 'walled town with gates' is also unlikely. Inasmuch as Port[1] and Port[3], though representing respectively L. *portus* and *porta*, were both masc. in OE., the fact that this *port* was also masc affords no evidence either way. The MFl. words are in a similar position: there *port* 'haven' and *porte* (later *poort*) 'gate' are both fem., and, *port* 'town' being also fem., the gender gives no indication. But the oldest and prevalent form of the word was *port* or *poort*, *porte* bring unusual and late, and prob. due to confusion with *porte* 'gate'; Verwijs and Verdam take it therefore as certain that *port* 'town' represented L *portus*; and if this was so in Flemish, it was doubtless so also in OE. The Netherlandish word was extensively used down to *c* 1500, and had numerous derivatives (of which *poorter* citizen, *poort-* or *poorterregt* burgess-ship, citizenship, are still in use). Cf. also Portery.]

If the OE. *port* survived into ME. (which is doubtful), it was then merged in the Fr. word, which became in Sc. the ordinary word for the gate of a town or city.]

Port (pōˑɔt), *sb.*[6] (*a.*) *Naut.* [Derivation obscure: see Note below.]

1. The left-hand side of a ship looking forward: = LARBOARD *sb.* Opposed to STARBOARD. (Often in phr. *to port*, A-PORT.)

In recent times generally substituted for the older *larboard* to obviate misunderstandings arising from the similarity in sound of *starboard* and *larb. ard.* By international convention, ships, esp. steamers, carry a red light on the port side.

1625–44 MANWAYRING *Sea-mans Dict.*, *To Port.* Is a word used in Conding the Ship, .they will use the word steddy a-Port, or Steddy a Star-board, the Ship heeles to Port: bring things neere to port, or the like. 1633 T. STAFFORD *Pac. Hib* III. viii (1821 562 With two takles hee might steere the Hoy either to Starboard or to Port. 1748 *Anson's Voy.* I. x. 104 The ship heeled .. two streaks to port. 1813 SOUTHEY *Nelson* I. iii. 124 They .. put the helm a-port, and stood after her again. 1844 *Admlty. Order* 22 Nov., The word 'Port' is frequently substituted..for the word 'Larboard', and as..the distinction between 'Starboard' and 'Port' is so much more marked than that between 'Starboard' and 'Larboard', it is their Lordships direction that the word 'Larboard' shall no longer be used. 1846 *U.S. Navy Department Notice* 18 Feb., It having been repeatedly represented to the Department that confusion arises from the use of the words 'larboard' and 'starboard' in consequence of their similarity of sound, the word 'port' is hereafter to be substituted for 'larboard'. 1875 BEDFORD *Sailor's Pocket Bk.* iii. (ed. 2) 61 If two sailing ships are meeting end-on,. so as to involve risk of collision, the helms of both shall be put to port, so that each may pass on the port side of the other. 1884 *Pall Mall G.* 25 Aug. 8/2 The..port bow of the *Camden* struck the port of the *Dione* between her rigging.

2. *attrib.* or as *adj.* Situated on, or turned towards the left side of a ship: = LARBOARD B.

1857 R. TOMES *Amer. in Japan* vii. 149 It was thought better to stand off on the port tack, in order to get well clear of the land. 1857 DUFFERIN *Lett. High Lat.* (ed. 3) 226 A promising opening was reported .. a mile or so away on the port-bow. 1875 BEDFORD *Sailor's Pocket Bk.* I. (ed. 2) 21 The Port Wing Ship of a Column is the ship on its extreme left. 1883 *Law Times Rep.* XLIX. 332/1 The *Clan Sinclair* .. was about to round Blackwall Point under a port helm. *Mod.* A green light seen on your port bow shows that a vessel is approaching on your left front on a transverse course (the green light being shown from the starboard side of that vessel).

[Note. This use of *port* may have arisen either from PORT *sb.*[1], senses 1, 2, or from PORT *sb.*[3], sense 2. When the steering apparatus was on the right side of the vessel (the *steereboard* or *starboard*), it would be convenient, in order to leave this free, to have the *port* (entering port) on the opposite side (the *lade board* or *larboard*). For the same reason, the vessel when in port, would naturally be placed so as to lie with her larboard alongside or facing the shore or port. For either reason, the larboard would be the port side. *Port* for *larboard* was in recorded use more than two centuries before it became official; the existence of PORT *v.*[2] indicates a still earlier colloquial use.]

Porte (pōrt). Also 6–8 port. [a. F. *porte*, in full *la Sublime Porte* = It. *la Porta Sublima*, transl. Turkish (Arabic) باب عالي *bāb i-ʿāliy*, lit. 'the sublime, high, or lofty gate', the official title of the central office of the Ottoman government, comprising the office of the Grand Vezir, of the Minister of Foreign Affairs, and of the Council of State (Redhouse, *Turkish Lex.* 1890). 'Gate' is supposed to refer to the ancient place of audience, etc., at the gate of the tent, or the king's gate; the attribute 'high' or 'lofty' is not literal, but the honorific attribute of the Turkish government. According to Zenker, the Western application of 'Sublime Porte' to the Turkish government or Ottoman state answers rather to the Turkish *dawlet-i-ʿāliye*, 'the sublime empire or state.'

[a. OF. *possession, -on* (12th c. in Hatz.-Darm.), ad. L. *possessiō-nem* seizing, occupation, n. of action. f. *possidēre*: see POSSIDE, POSSESS.]

1. The action or fact of possessing, or condition of being possessed (see POSSESS 1, 2); the holding or having something (material or immaterial) as one's own, or in one's control; actual holding or occupancy, as distinct from ownership.

a 1340 HAMPOLE *Psalter* xv. 6 Merkis of my possession. 1390 GOWER *Conf.* I. 276 And yaf therto possessioun Of lordshipe and of worldes good. 1473 *Rolls of Parlt* VI. 91/2 To the Patronage or Possession of the Church of Prescote. 1526 *Pilgr. EDGEWORTH *Patron.* xviii, I am not one of those *exigeante* mothers who expect always to have possession of a son's arm. 1875 JOWETT *Plato* (ed. 2) I. 185 Philosophy is the possession of knowledge.

b. *Law.* The visible possibility of exercising over a thing such control as attaches to lawful ownership (but which may also exist apart from lawful ownership); the detention or enjoyment of a thing by a person himself or by another in his name; the relation of a person to a thing over which he may at his pleasure exercise such control as the character of the thing admits, to the exclusion of other persons; *esp.* the having of such exclusive control over land, in early instances sometimes used in the technical sense of SEISIN.

In the Roman Law, 'possession is usually said to consist of two elements - physical control and intention to possess; but in English law the latter element does not assume the same prominence as, in the shape of the *animus domini*, it has been thought to assume in Roman law... The general rule of English law is that exclusive physical control gives legal possession, unless the apparent possessor holds only as servant or bailiff on behalf of another' (J. M. Lightwood in *Encycl. Laws Eng.* (1898) X. 229) Primarily, the term denotes a state of fact, but this fact carries with it legal advantages, and so is the source of rights. If the state of fact could always be ascertained with certainty, and if it always produced the normal legal effects, the subject of possession would present little difficulty; but it is frequently uncertain to whom the actual control of a thing is to be attributed, and, when this question is settled, the law may credit the advantages of possession to some person other than the apparent possessor... Hence arises the distinction between *actual* and *legal* possession. Actual possession denotes the state of fact; but the person to whom are credited the advantages of possession has the legal possession, whether he is the actual possessor or no. Legal possession, when not accompanied by possession in fact, is known as 'possession in law'. (*Ibid.* 228-9.) See this article; also (*inter alia*), *Essay on Possession in the Common Law* by F. Pollock and R. S. Wright, 1888, *Treatise on Possession of Land* by John M. Lightwood, 1894.

Termes Law* 158 Possession is said two wayes, either actuall possession, or possession in law. Actuall possession is when a man entreth in deede into landes or tenements to him discended or otherwise. Possession in lawe, is when landes or tenements are discended to a man, and he hath not as yet really, actually, and in deede entred into them. 1706 PHILLIPS, *Unity of Possession*, is when the Possession, or Profit is united with the Property. Thus, if the Lord purchase the Tenancy held by Heriot-Service, then the Heriot is extinct by Unity of Possession, i.e. because the Seignory or Lordship and the Tenancy are now in one Man's Possession. 1766 BLACKSTONE *Comm.* II. xxv. 387 First then of property in possession absolute; which is where a man hath, solely and exclusively, the right, and also the occupation, of any moveable chattels. 1813 CRUISE *Digest* (ed 2) III. 330 The first degree of title is the bare possession, or actual occupation of the estate, without any apparent right, or any pretence of right, to hold and continue such possession. 1837 BARON PARKE in Meeson & Welsby *Rep.* II. 331 Ownership may be proved by proof of possession, and that can be shown only by acts of enjoyment of the land itself. 1861 J. FITZGERALD in *Law Rep.* 12 App. Ca. 556 By possession is meant possession of that character of which the thing is capable. 1888 POLLOCK & WRIGHT *Possession in Com. Law* 1 As the name of Possession is one of the most important in our books, so it is one of the most ambiguous. Its legal senses (for they are many) overlap the popular sense. *Ibid.* 26 The following elements are quite distinct in conception..i. physical control, detention, or de facto possession. ..ii. legal possession the state of being a possessor in the eye of the law. iii. Right to possess or to have legal possession. *Ibid.* 27 Right to possess, when separated from possession, is often called 'constructive possession'. *Ibid.* 58 A servant in charge of his master's property, or a person having the use of anything by the mere licence of the owner generally has not possession. 1894 J. M. LIGHTWOOD *Possession of Land* 2 Possession which is recognized by the law.. is known as civil possession. The actual possession may be held by another on behalf of the civil possessor—by his servant or tenant, for example—and here the civil possession is still based on actual possession. 1898 — in *Encycl. Laws Eng.* X. 232 A person holding land as a tenant for years is denied the special form of legal possession known as seisin. The English law, however, differing herein from the Roman law, does not refuse legal possession to bailees. *Ibid.* 236 In the case of goods..the mere right to possession is sometimes described as 'constructive possession', and is allowed the advantages of actual possession.

I. †1. From the beginning of the 16th c., applied to men with horses stationed or appointed in places at suitable distances along the post-roads (see Post-stage), the duty of each being to ride with, or forward with all speed to the next stage, the king's 'packet', and at length the letters of other persons, as well as to furnish change of horses to 'thorough-posts' or express messengers riding post. *To lay posts*, to establish a chain of such 'posts' along a route for the speedy forwarding of dispatches.

Posts were at first 'laid' temporarily only, when occasion demanded direct communication with a distant point; they were at length established permanently along certain routes. These 'posts' began in the 17th c. to be called 'post-masters' (q. v.), and were the precursors of the present local postmasters, or persons in charge of the local post offices, who receive and dispatch the local mails. In the 16th and 17th c., these 'posts' had also usually the exclusive privilege of furnishing post-horses to ordinary travellers, and of conducting the business of a posting establishment, which has since been separated from that of the Post Office.

(*Note.* The 'posts' in sense 1 correspond to the *equites dispositi* or 'posted horsemen' of classical and later times (*cf. Cæsar B. C.* III ci). The earliest known use of *posta, poste*, pointing to the modern sense is by Marco Polo, 1298, who applies, in the French text, ch xcvii (ed. 1865, 435), *poste*, and, in the Italian, ch lxxxi (ed 1827, I. 91), *posta*, to the stations 25 miles apart on the great roads, at which the messengers of the Great Khan or Emperor of China changed horses, and at each of which from 300 to 400 horses are said to have been kept for their service. The expression 'nous disons poeste de chevaus', i.e. 'we say post (or station) of horses', identifies the word originally with It. *posta* in the sense of Post *sb.*[2] The early course of the word in Europe is not altogether clear; but Milanese Latin documents of 1425-8 (L. Osio *Doc. Dipl. Milanesi*, 1872, II. 163, 357) have *portantur die noctuque celeriter per cavallarium postarum*, 'let them be carried day and night swiftly by a post rider (horseman of the posts)', and *mittat eas per caballarios postarium*, 'let him send them by the horsemen of the posts'. In the second half of the 15th c. F. *poste* is found also as the appellation of the courier, and in this sense had become masculine before 1480. In English, also, the application of *poste, post*, to the courier is seen to go back practically to the earliest use of the word.]

b. Post captain. A captain who 'takes post'; a designation formerly applied, officially and otherwise, to a naval officer holding a commission as captain, to distinguish him from an officer of inferior rank, to whom the courtesy title of captain was often given, either as being an acting captain, or as being master and commander of a vessel not rated to be commanded by a full-grade captain, and so not said to 'give post'. *Obs.* exc. *Hist.*

So far as the Naval Regulations are concerned the appellation appears to date from about 1731-47, and to have ceased in 1824, when the rule was laid down that only officers appointed to command 'ships of sixth rate and upwards shall henceforth be styled Captains'. But, in un official language, the courtesy use of 'Captain' for the 'Master and Commander' of a smaller vessel, and the distinctive appellation 'Post-Captain', lingered to a much later period.

Post, obs. form of *posed*, pa. pple. of Pose *v.*[1]

Post, variant of Poust *Obs.*, power.

Post- (pōst), *prefix*, repr. L. *post*, adv. and prep., after, behind. In L., prefixed adverbially to verbs, as *posthabēre* to hold or esteem after, *postpōnĕre* to place after, postpone, *postscribĕre* to write after; also to pples., vbl. sbs., and other verbal derivatives, as *postgenitus* after-born, *postpositus* placed after, *postscriptus* written after, *postveniens* coming after, *postpuritor* after-getter, heir. More rarely formed on the prep. and an object as, of time, *postauctumnālis* coming (*post auctumnum*) after autumn, post-autumnal; of place, *postlīminium* (a return) behind the threshold, *postscænium* (the space) behind the scenes. In English its use has received great extension, esp. in the prepositional relation, in which compounds are formed almost at will, not only on words from Latin, but also, in technical terms, from Greek, and sometimes even on English or other words, as *post-breakfast*, *post Easter*, *post-Elizabethan*. These are often opposed to formations in *ante-* or *pre-*.

In compounds derived or formed from L., or on L. analogies, as Post-date, -exist, -fix, -pone, -pose, -posit, -vene, -gesture, -jacent, script (q. v.); also in nonce-wds., sometimes formed after, and as the opposites to, words in *ante-* or *pre-* (exceptionally *pro-*).

Po·stage sta·mp. [f. POSTAGE[1] + STAMP *sb.*] An official stamp, either a stamp embossed on an envelope or impressed on a card or wrapper, or else (now usually) a small adhesive label having a specified face-value (in Great Britain from ½*d.* upward), and bearing a design of a certain pattern and colour appropriated to its value, sold by or on behalf of the Post Office, to be affixed to any letter or packet sent by post, as a means of prepayment of postage, and as evidence of such payment.

The design is generally the head of the Sovereign or Ruler (whence in Great Britain the early popular appellation 'Queen's head'), or the national arms or emblems, but many countries use various symbolic or fanciful pictorial devices, historical portraits, etc.

The name *stamp* was originally applied to the marks stamped or impressed by the Post Office on letters for various purposes, among others that of stating whether they were 'prepaid', 'unpaid', 'free', partly paid, or paid by the twopenny or other post. When adhesive labels and impressed envelopes were introduced in 1840, these took the place of the 'paid' or 'prepaid' stamp, and appear to have been popularly called 'postage stamps' from the first. The official and more accurate name was *postage label*; but the popular usage prevailed; by 1850 *postage label stamp* was in official use, and finally *postage stamp* was accepted. The actual *stamps* (Ger. *briefstempel*) which continued to be impressed by the Post Office after 1840, to show the place and date of postage and arrival, and to obliterate or deface the postage-label, are now usually distinguished as *post-marks* and *obliteration-stamps* or *-marks*.

Postmaster[2] (pō̆ustmāstəɹ). The name given at Merton College, Oxford, from the 16th c., to the class of poor scholars instituted in 1380 by John Wyllyot; now the equivalent in that college of the term 'scholar' in general collegiate use.

For the first hundred years these appear in the College Register only as *pueri (M. Johannis) Wilyot*, 'Wylyot's boys'. But their essential characteristic was the reception of a limited weekly 'portion', *ebdomadalis portionis*; hence we find them (from 1483) styled *portionistæ* or (1540) *portionistæ*, a term English ed in the 17th c., as by Wood, as *portionists*. The age of the term *postmaster* is not certain; it occurs in the College Records in 1593 in the established name of *Postmasters' Hall*, the dwelling opposite to the college in which the *pueri* or *portionistæ* had resided till *c* 1575, when they were moved into the college. It also appears as the appellation of the *portionistæ* in English letters of 1610 preserved in the Records. But these casual occurrences show only that it was then a long-established name. As to its origin nothing is known: it has been variously conjectured to be a corruption of *portionista*, or a rendering of *'post-magister* or *'post-minister*, in allusion to the fact that the *portionistæ* were at one time servitors to the Masters or Fellows, perhaps standing behind their chairs at dinner, etc. But *post-minister* does not occur in the college register, and the occurrence of *post-magister* is doubtful.

Potash (pŏ·tæʃ), *sb.* [Early mod. E. *pot ashes* pl., app. ad. Du. *pot-asschen* (1599 Kilian, 'quod in ollis . . . asseruentur, ne liquescentes effluant'), mod. Du *potasch*; so Ger. *pottasche*, Swed. *pottaska*, Da. *potaske*; also F. *potasse* (1577 *pottas*, at Liège, Godef.), It., Pg., mod.L. *potassa*, Sp. *potasa*.]

The sense-history of *potash* and its derivatives is involved in the advance of chemical knowledge. The earliest term was *pot ashes* or *pot-ashes* = Du *pot asschen*, applied to the crude products. The essential substance of these, when purified from extraneous matters, was spoken of in the singular as *pot-ash* or *potash*. In 1756 this was proved by Dr. Joseph Black of Edinburgh to be a compound substance, a carbonate, the removal from which of the carbonic acid left a 'caustic alkali' or 'lye' (really the hydroxide, or caustic potash, KHO), which chemists thereafter generally considered to be the true *potash* (in Fr. *potasse*). In 1807 this, in its turn, was shown by Sir H. Davy to be not a simple substance, but to contain a new metal, of which he believed it to be the oxide. To the metal (K) he gave the name *potassium*, to the oxide (on the analogy of *magnesium* and *magnesia*, *sodium* and *soda*, etc.) that of *potassa*. Next year, Dakeel gave reasons for believing that the latter contained also water, and it was subsequently shown to be the hydroxide or hydrate (KHO), the simple oxide being the anhydrous form (K_2O). The salts of potassium, in accordance with the chemical theory of the time, were viewed as compounds of the oxide, and variously named *carbonate of potassa*, *of potass*, *of potash* (= potassium carbonate, K_2CO_3), *chlorate of potassa*, *potass*, or *potash* (= potassium chlorate, $KClO_3$), etc. Commercially 'potash' is still often applied to the carbonate; by chemists usually to the hydroxide or hydrate, caustic potash, KHO, but sometimes to the anhydrous oxide, K_2O, and in names of compounds it is still often used instead of 'potassium', as *chlorate of potash* = *potassium* or *potassic chlorate*.

1. An alkaline substance obtained originally by lixiviating or leaching the ashes of terrestrial vegetables and evaporating the solution in large iron pans or pots (whence the name). Chemically, this is a crude form of potassium carbonate (more or less mixed with sulphate, chloride, and empyreumatic substances), but was long thought to be (when freed from impurities) a simple substance.

a. *orig.* plural, *pot ashes*, *pot-ashes*: now applied to the crude substance.

When purified by calcination and re-crystallisation, known as *pearl ashes* or *pearl-ash*.

b. singular, *pot ash*, *potash*: applied esp. to the purified carbonate, as a substance.

[ad. Sp. *patata*, a variant of BATATA, orig. the native name in Haitian in sense 1. So, in same sense, F. *patate*, obs. It. *potata*, Ger. *potate*.]

Sense 1 is the original; the plant to which it is applied was to Gerarde, in 1597, 'the common Potatoes'; the plant in sense 2, on account of its general likeness to the other as producing esculent tubers, he called from its alleged source 'Virginia Potatoes', and (in his *Catalogue* of 1599) 'Bastard Potatoes'; but when this came to be an important object of cultivation as a food plant, it became 'the potato' par excellence; the exotic plant and tuber originally so named being distinguished by some adjunct. In 17th c. instances of the word it is often difficult or impossible to determine which plant is meant.

1. A plant, *Batatas edulis*, N. O. *Convolvulaceæ*, having tuberous roots, for which it is cultivated for food in most tropical and subtropical regions of the world; = BATATA. Its native region is unknown, but it appears to have been seen by the Spaniards first in the West Indies *c* 1500. Now distinguished as *Sweet* or *Spanish potato* (see 3 a).

2 The plant *Solanum tuberosum*, a native of the Pacific slopes of South America, introduced into Europe late in the 16th century, and now widely cultivated for its farinaceous tubers: see b.

Described in 1553, under the name *papas*, in the *Cronica de Peru* of Piedro Ciera, cap. xl, f 5. Introduced into Spain, it is said, from Quito, soon after 1580, and thence, *c* 1585, into Italy; in 1587 grown at Mons in Hainault, whence in 1588 two tubers were obtained and grown by the botanist Clusius, Keeper of the Botanical Garden to Maximilian II; described by him as *Papas Peruanum*. Soon grown in other botanic gardens, as at Breslau in 1590. The plant may have been brought independently to England, where Geraide had it growing in 1596; but he was in error in his statement that he obtained it from Virginia (whence the erroneous name *Virginia Potatoes*, long kept up by English writers); for the plant is not a native of Virginia, and was not cultivated there in 16th c. In 1693 its introduction into Ireland was attributed to Sir Walter Raleigh 'after his return from Virginia' (where he never was); but no contemporary statement associating Raleigh's name with the potato has been found. See Brushfield *Raleghana* II. in *Trans. Devonsh. Assoc.* 1898, XXX 158–197; B. Daydon Jackson in *Gardeners' Chron.* 1900, XXVII. 161, 178.

M'Ilwraith *Guide Wigtownshire* 10 In 1728 Marshal Stair introduced the culture of the potatoe into Wigtownshire.

4. *Gram* That expresses potentiality or possibility: *potential mood*, a name sometimes given to the subjunctive mood, when used to express possibility; the subjunctive mood used potentially.

In French Grammar, sometimes applied to the Conditional (*j'aurais, je serais*, etc.).

[1524 Linacre *De Emendata Structura Latini Sermonis* (ed Paris 1550) 30 Potentialem vocamus, quem Graeci per ἂν coniunctionem & verbum duplicis modi, alias indicatiui, alias optatiui, explicant.]

Murray *Eng. Gram.* (ed. 5) I. II i. 117 That the Potential Mood should be separated from the subjunctive, is evident, from the intricacy and confusion which are produced by their being blended together, and from the distinct nature of the two moods; the former of which may be expressed without any condition, suppo ition, etc 1837 G. Phillips *Syriac Gram.* 111, The tense-, especially the future, either alone or in connection with one or more particles, in many cases express a potential, subjunctive, or hypothetical sense. 1876 Mason *Eng. Gram.* (ed. 21) 60 To these moods [Infinitive, Indicative, Imperative, Subjunctive] many gramm rians add the Potential Mood, meaning by that mood certain combinations of the so called auxiliary verbs *may, might, can, could, must*, with the infinitive mood. This is objectionable.

5. *Physics.* **a.** *Potential function*: a mathematical function or quantity by the differentiation of which the force at any point in space arising from any system of bodies, etc. can be expressed. In the case in which the system consists of separate masses, electrical charges, etc., this quantity is equal to the sum of these, each divided by its distance from the point.

Introduced in 1828, by G. Green, with special reference to electricity. Now usually called simply *potential* (see B 4).

1828 G Green *Applic Math. Anal. to Electr. & Magn.* in *Math. Papers* (1871) 9 Nearly all the attractive and repulsive forces . in nature are such, that if we consider any material point *P*, the effect, in a given direction, of all the forces acting upon that point, arising from any system of bodies *S* under consideration, will be expressed by a partial differential of a certain function of the co ordinates which serve to define the point's position in space. The consideration of this function is of great importance in many inquiries..We shall often have occasion to speak of this function, and will therefore, for abridgement, call it the potential function arising from the system *S*. 1882 Minchin *Unipl. Kinemat.* 135 The function ϕ is called the potential-function of the strain, and the curves obtained by varying the constant in the equation $\phi = C$ are called curves of equal potential.

b. *Potential energy*: energy existing in a positional form, not as motion; see Energy 6.

Introduced by Rankine in 1853, *potential* being opposed to *actual*, as in sense 2; Thomson and Tait substituted *kinetic* for *actual*, making *potential energy* the opposite of *kinetic energy*. The Latin expression *vis potentialis* had been used by the two Bernoullis and Euler *a* 1750.

[1744 Euler *Methodus inveniendi lineas curvas*, etc. 246 Quamobrem cum vir celeberrimus..Daniel Bernoulli mihi indicasset se universam vim, quae in lamina elastica incurvata inest, una quadam formula quam *vim potentialem* appellat complecti posse.]

1853 W Rankine *Transform. Energy* in *Sci. Papers* (1881) 203 By the occurrence of such changes, actual energy disappears, and is replaced by Potential or Latent Energy; which is measured by the product of a change of state into the resistance against which that change is made. (The vis viva of matter in motion, thermometric heat, radiant heat, light, chemical action, and electric currents, are forms

of actual energy; amongst those of potential energy are those of the mechanical powers of gravitation, elasticity, chemical affinity, statical electricity, and magnetism. 1866 Odling *Anim. Chem.* 71 We may thus render muscular force latent in a stretched bowstring, raised cannon-ball, or other instrument, for any length of time. This latent force is generally spoken of as potential energy, while the active force exertable at any moment by the flying arrow or falling ball constitutes its actual or dynamic energy. 1868 Thomson & Tait *Elem. Dynamics* 74 The *potential energy* of a conservative system, in the configuration which it has at any instant, is the amount of work that its mutual forces perform during the passage of the system from any one chosen configuration to the configuration at the time referred to. 1875 Gamgee tr. *Hermann's Elem. Hum. Physiol.* Introd. 1 The human body..is an organism in which, by the chemical change of its constituent parts, *potential* is converted into *kinetic* energy. 1876 Tait *Rec. Adv. Phys. B. *sb.* † 1. A potential agent, a thing that gives power. *Obs. rare.*

1656 Blount *Glossogr.*, *Potentials*, things apt to breed or give power, strength or ability.

2. That which is possible, opposed to what is actual; a possibility.

Lit.* I. xii. 245 The *potential* works *in* them, even as the *actual* works on them! 1883 Edersheim *Life Jesus* (ed. 6) I. 6:4 With this belief our highest thoughts of the potential for humanity are connected. 1889 J. M. Robertson *Ess. Crit. Method* 92 The faculty..must be held to reach its highest potential, on the side of literature, in the case of personal gift cultivated by a literary life.

3. *Gram* Short for *Potential mood*: see A 4.

4. *Physics.* Short for *potential function*: see A. 5 a. Hence, the amount of energy or quantity of work denoted by this, considered as a quality or condition of the matter, electricity, etc., in question. See quots.

1828 G. Green *On Applic. Math. Anal.* etc. in *Math. Thomson in *Philos. Mag.* Ser. IV. V. 288 *note*, The potential at any point in the neighbourhood of or within a charged body is the quantity of work that would be required to bring a unit of positive electricity from an infinite distance to that point if the given distribution of electricity remained unaltered. 1866 R. M. And the difference of potential, which determines the amount of this motion, is called electromotive force. 1879 G. Prescott *Speech Telephone* 37 The difference..of magnetic potential existing between the diaphragm and the core is increased. 1881 Maxwell *Electr. & Magn.* I. 76 Potential, in electrical science, has the same relation to Electricity that pressure, in Hydrostatics, has to fluid, or that temperature, in Thermodynamics, has to Heat. 1881 Jenkin *Electr.* 51 The effect of contact in producing or maintaining difference of potentials. 1892 *Pall Mall G.* 4 Feb. 6/3 (Mr. Tesla's demonstration) Currents of these extremely high potentials appear to be absolutely without effect upon the human organism. 1902 Sloane *Stand. Potwaller (pɒ·t,wɒ·ləɹ). [f. POT *sb.*[1] + *waller*, agent-n. from WALL *v.*, OE. *weallan* to boil.]

lit. = *Pot-boiler*, the boiler of a pot: the term applied in some English boroughs, before the Reform Act of 1832, to a man qualified for a parliamentary vote as a householder (i. e. tenant of a house or distinct part of one) as distinguished from one who was merely a member or inmate of a householder's family; the test of which was his having a separate fire-place, on which his own pot was boiled or food cooked for himself and his family.

According to 18th c. statements, the test was at times abused by persons not householders, who in anticipation of an election and of receiving money for their vote, boiled a pot in the presence of witnesses on an improvised fireplace in the open air within the borough, and thus passed as potwallers.

Pound (paund), *sb.*[1] Forms: 1–4 (*Sc.* and *n. dial.* –9) pund, (4–5 *n. dial.* punde); 3– pound, (4–6 pounde, pownd(e; pond(e). [OE. *pund* (pl. *pund*):—WGer. stem **pundo-* pound (weight), = OSax., OFris., ON., Goth. *pund* (MLG. *punt*, LG. *pund*, MDu. *pont*, Du. *pond*), OHG. *phunt* (MHG. *pfunt*, G. *pfund*), a very early adopted word, a. L. *pondo* indecl. a pound (weight), orig. instr. abl. of **pondus*, *-um* = *pondus*, *-er* weight, in use short for *libra pondo* a pound by weight, a pound weight.]

I. 1. A measure of weight derived from the ancient Roman *libra* (= 327·25 grams), but very variously modified in the course of ages in different countries, and as used for different classes of things; in the British Empire now fixed for use in trade by a Parliamentary standard. Denoted by *lb.* (L. *libra*).

Formerly used without change in the pl., a usage still sometimes retained after a numeral, esp. *dial.* and *colloq.*, also in *comb.* as *a five pound note*, *a twenty pound shot.*

This pound consisted originally of 12 ounces, corresponding more or less to that of Troy *weight*, q.v., which contains 5760 grains = 373·06 grams. This is still used by goldsmiths and jewellers in stating the weight of gold, silver, and precious stones; but as early as the thirteenth or fourteenth century a pound of sixteen ounces was in use for more bulky commodities. This was made a standard for

general purposes of trade by Edward III, and known as the pound *sweir de peis*, i. e. of merchandise of weight, now called Avoirdupois, q.v. This pound of 16 ounces, containing 7000 grains = 453·6 grams, has been since 1826 the only legal pound for buying or selling any commodity in Great Britain. In former times the pound varied locally from 12 to 27 ounces, according to the commodity, pounds of different weight being often used in the same place for different articles, as bread, butter, cheese, meat, malt, hay, wool, etc. See a list in *Old Country and Farming Words* (E. D. S.) 174-5. The Scotch pound of 16 ounces of Troy or Dutch Weight consisted of 7608·9496 grains; the Tron pound kept at Edinburgh = 9621·67 grains. *Pound* is also used to translate foreign names of weights, of cognate origin or representatives of L. *libra*. These vary greatly: in Italy between 300 and 350 grams, in Spain and Portugal, the Netherlands, and some German states between 459 and 469 grams, in other German states, Denmark, etc. between 477 and 510·22 grams. But the standard German *pfund* is now 500 grams, i. e. half a kilogram.

†**1.** *trans.* To weigh. *Obs. rare*—°.

2. *Coining.* To test the weight of coins (or of the blanks to be minted) by weighing the number of these which ought to make a pound weight (or a certain number of pounds), and ascertaining how much they vary from the standard.

From the earliest times, in the Indenture under which the Master of the Royal Mint produced coins for the King, a limit was assigned within which the weight was to be maintained; and as it was impossible to make every coin of the exact weight, it was customary, before 1870, to fix the number of grains variation permissible in each pound weight, taken at random from the mass of coins, this variation being termed 'remedy for the Master'. Thus, for gold coins, in which 20 troy pounds of standard gold make 934½ sovereigns, the Indenture of 1817 allows a margin of 'twelve grains in the pound weight and no more'. By the Coinage Act of 1870, the 'remedy' was fixed on the piece, as ½ grain on each sovereign, each of which is now separately tested by an automatic weighing apparatus of great delicacy.

1890 *Cent. Dict.* s. v., Pounding in coining. 1907 *Let. fr. Royal Mint*, The present law is far more stringent, but (for particular purposes) we still constantly resort to pounding in the Mint, and always in the case of bronze coins.

1907 *Let. to Editor fr. Cheshire*, The weight of salt contained in one gallon of brine. is usually about 2 lb. 10 oz; if it is as little as 2 lb. 8 oz, the brine is not worth working. The poundage is measured by a graduated hollow glass instrument, similar to that used in ascertaining the specific gravity of a fluid. (The gallon is not the imperial, but the old wine gallon. The standard poundage is thus more than 3 lb. to the imperial gallon.) The word is in constant use at the Cheshire and Staffordshire Salt Works, but is never used at Droitwich.

Pour (pō ɹ), *v.* Forms: see below. [ME. *pour-en*, evidenced early in 14th c.; not in OE., nor in the cognate langs.; source obscure: see Note below. The prevailing written form from the first has been *pour(e* (also spelt *powr(e, power*), in ME. (as still in Sc. and n. dial.) = (pūr), in mod. Eng. till 19th c. (and still dial.) = (pɹuəɹ), proved by the spelling *powre, power*, and by rimes in all the poets from Pope to Tennyson and Swinburne (these last have also põəɹ): see illustration of Forms. But the spelling *pore* is found in some 15th c. writings, and *poor* (perh. = pūr) in Palsgrave and Shaks. The late 18th and 19th c. (põəɹ), given by Nares 1784, disapproved by Walker 1791–, approved by Webster 1828, Smart 1836, is not easy to account for: it could hardly be derived from (pɹuəɹ); it may be a dialectal survival of the 15th c. *pore*, though connecting evidence is wanting; it may also repr. 16th c. *poor* (=pūr), altered as in *floor, door*, and vulgar *more, pore, shore, yore*, for *moor, poor, sure, your.*]

[*Note.* It has been suggested that ME. *pour-e n* was an irregular representative of F. *purer*:—L. *purāre* to purify (with religious rites). F. *purer*, now 'to scum', had in OF. the senses 'to purify, clarify, cleanse, rinse'; also in Norman 'to drip' (Lajoie revint tant moutie, qu'il puroyt de toutes parts, *c* 1560 in Godef.), so still in Guernsey (J'o l'aire qui pure dans l'auge, 'I hear the cider dripping or pouring into the trough' Moisy), and in mod. Norman and other dialects 'to drip, drop, ooze, or flow out', in Burgundy, etc., 'to press, wring, or squeeze juice or water out of anything' (Godef.). English shows no trace of an original sense 'purify', nor even of 'press or squeeze out', and the intransitive sense 6, which comes near that of 'drip or flow out', is not of early appearance; so that the historical connexion of sense is not evident. The phonology also presents difficulty; it is doubtful whether Eng. has any certain instance of *ou* (or even *o*, *oo*) from Fr. *u*: —L. *u*.]

fig. 1884 tr. *Lotze's Logic* 191 Even in cases where calculation in the strict sense is impossible we are inclined to use the term 'power' when the meaning and importance of a conception is raised in some peculiar manner.

† **b.** *In power* (tr. *ἐν δυνάμει*, Euclid): a phrase used in relation to the squares of magnitudes that are compared, as distinguished from the magnitudes themselves; thus magnitudes are *commensurable* (or *incommensurable*) *in power* when their squares are commensurable (or incommensurable). So *equal in power, of equal power*: see quots. *Obs.*

13. Any form of energy or force available for application to work. *spec.* **a.** Mechanical energy (as that of gravitation, running water, wind, steam, electricity), as distinguished from hand-labour; often viewed as a commodity saleable in definite quantities. 1727-41 CHAMBERS *Cycl.* s. v., Power in mechanics denotes a force, which being applied to a machine, tends to produce motion... If the power be a man, or a brute, it is called an animate power; if the air, water, fire, gravity, or elasticity, an inanimate power. 1728 PEMBERTON *Newton's Philos.* 55 Caused..from the influence of the power of gravity united with the general laws of motion. 1808 J. 1806- [see HORSE-POWER]. 1815 J. SMITH *Panorama Sc. & Art* I. 294 In calculating the power of a machine, it is usually considered in a state of equilibrium; that is, in the state when the power which has to overcome the resistance, just balances it. 1825 J. NICHOLSON *Operat. Mechanic* 67 The product of these two numbers 3970 will express the power of the water to produce mechanical effects. 1849 NOAD *Electricity* (ed. 3) 421 With such a battery power the sparks from the primary coil are brilliant in the extreme. 1882 *Metal World* No. 19. 297 Power is the product of force and velocity; that is to say, a force multiplied by the velocity with which it is acting is the power in operation. 1882 MINCHIN *Unipl.
